

Staff Development Workshop for K–12 Teachers and Administrators

Quantum Learning for Teachers is a synergy of best practices supported by educational research that can be framed around any K–12 subject (reading, math, etc.) or content that is taught in the classroom.

Date and Location

February 25-26, 2010 Martin Professional Development Center, 2400 Fairfax Ave., Nashville, TN 37212

Day 1: Quantum Learning for Teachers Level 1

Day 2: Quantum Learning for Teachers Level 2

Workshop Details

Times: 8:15 am – 3:45 pm

Fee: \$160 per person per day for individuals
\$150 per person per day for groups of five or more
attending together from the same school

Included in the fee: Workshop manual and binder, lite continental breakfast and beverages. (*Lunch is on your own.*)

Who should attend: Principal/teacher teams, assistant principals, district staff development directors, curriculum and instruction directors

Quantum Learning is based on more than 28 years experience and research with over 55,000 students and 45,000 educators across the U.S. This methodology boosts teachers' ability to inspire and students' ability to achieve, providing important distinctions about what really works in the classroom. Quantum Learning shows teachers **how to** orchestrate their students' success by taking into account the environment, the atmosphere, the design of the curriculum and how it is presented, use of classroom traditions, and brain-considerate, research-based methods for engaging students while promoting greater comprehension and memory. Quantum Learning includes lesson planning guidelines to help teachers cover all the bases without having to integrate different theories or refer to different source materials. When teachers know HOW TO delivery their content in more effective ways, students are more engaged and excited about learning. They become joyful, motivated and successful learners in Quantum Learning classrooms.

Quantum Learning for Teachers:

- Provides a proven research-based approach to the design and delivery of academic curriculum, K – 12, including math and science.
- Synthesizes best teaching practices into an effective, comprehensive model, turning abstract theory into practical techniques that can be immediately applied in the classroom and school.
- Gives teachers skills to engage students, boost comprehension through more brain-considerate delivery and interaction methods, and generate enthusiasm for learning.
- Is designed to build teacher capacity and support effective classroom management – including with large class sizes.
- Provides tools for the development of 21st century skills in all of students.
- Is the “orchestration” of dynamic, inquiry pedagogy and strategies that close gaps in learning, build new schema, and promote greater confidence in ALL students.
- Teaches rich and rigorous, high impact techniques that engage secondary learners, promoting greater success and interest in staying in school.

“Quantum Learning is the single most effective method I’ve ever seen – sound science, respectful of students as learners and people, and sound behavioral principals. The techniques are embedded in the learning. This is energizing and renewing work. It contextualizes techniques that we might already use but puts them into a framework where the very best practices that are out there work together and make sense. Outstanding!”

– Renee Delapp, Intervention Counselor, Union County Public Schools, Knoxville

Supports standards-based curriculum and NCLB. Certificates of Completion are provided to validate workshop attendance and hours for each program.

Workshop Goal:

To provide teachers with the **HOW TO** for more effective content delivery and classroom management, and help them build a repertoire of teaching methods and tools that effectively engage every student in the classroom – resulting in improvement in grades, motivation, and confidence.

Workshop Benefits:

- Infuse joy into teaching and learning
- Learn proven methods and strategies to promote learning
- Learn methods for differentiating instruction
- Improve student participation and follow-through
- Make even the most rigorous content easier to learn and retain
- Promote critical thinking skills in students
- Improve classroom behavior
- Accelerate the learning process
- Improve student testing skills
- Build rapport and student self-esteem
- Identify different learning styles
- Make content more meaningful and relevant to students
- Reduce the achievement gap and raise every student's capability
- Provide core tools and implementation strategies for an effective professional learning community in your school

Quantum Learning for Teachers Training Levels

Level 1/Day 1 – Understanding Foundational Structures and Tools for Teacher Effectiveness

Major Content Modules: The QL Model Overview and framework, Narrative Chain, Big Brain Idea # 1, The Five Tenets of Effective Teaching, Orchestrating student learning, The QL Success Model, The 8 Keys of Excellence – foundation for classroom management, Using music effectively in the classroom, creating powerful learning environments, Implementation

Level 2/Day 2 – Developing Skills for Classroom Management and Engaging Students in Learning

Major Content Modules: Review of Day 1, Building Classroom Traditions, Path of Memory, Building a Home Court Advantage in the Classroom, Keying in the Prime Directive for Engaging Students, State Facilitation, Learning Diagrams, RespondAbility, Character Development Tool and the Key of Ownership – Living Above The Line, The QL Lesson Design Frame, Practice on Success Model Experience, Implementation

The Results.

Studies show after Quantum Learning training, students:

89% Increase self-esteem

73% Improve grades

68% Higher attendance

66% Better behavior

Quantum Learning has been approved by the Northwest Regional Educational Laboratory for their national Catalog of School Reform Models and is accredited by the Commission on International and Transregional Accreditation (CITA) and the North Central Association of Colleges and Schools.

“Quantum Learning, without a doubt, is the future of true instruction for learners of all ages.”

– Jerry Apple, Principal, Whitehouse Middle School, Whitehouse, TN

“There can be no Relevance without Relationships, and there can be no Rigor without Relevance. No other training we offer in our district demonstrates this premise and, most importantly, gives teachers the foundation and skills to accomplish this than Quantum Learning. Your program is the leader in our district for the practical skills to support this most important mission.”

– Linda Merrell, Senior Director, Staff Development, Cypress Fairbanks ISD, Houston, TX
