- Managers
- Mentors
- Support providers
- Instructional coaches
- Team leaders

Quantum Learning's dynamic **Put Me In, Coach!** two-day course enhances the observation and coaching skills of those in instructional coaching, mentoring and tutoring roles. A synthesis of best science-based coaching practices, this course provides theory, models and skills for improving teacher effectiveness and student achievement. **Put Me In, Coach!** combines proven strategies and models from a variety of disciplines.

Instructional coaching models are generally cognitive or directive. In practice, a blend of both styles yields the best results. **Put Me In, Coach!** integrates the two approaches and provides additional skills that maximize the quality of implementation and impact.

Put Me In, Coach! Topic Highlights:

- The supreme goal of coaching
- Importance of efficacy and how to build it
- Four essential components of enhanced skill integration
- The five variables for differentiated coaching
- Competency and moving through the learning zone
- The coaching cycle: five stages that promote professional conversation

"There were dozens of powerful moments for me in the *Put Me In, Coach!* training. Our QL trainer modeled masterful coaching strategies and helped me to think carefully about my own practice. The knowledge and skills I learned in this training inspire me on a daily basis and shape much of how I support teachers today."

– Keather Pierantoni, Instructional Facilitator, Lincoln County School District #2, WY

Quantum Learning®

Transforming Education. Transforming Lives.

Put Me In, Coach!

This valuable course contains useful theory, models, strategies and templates for administrators, mentors, master teachers, support providers, supervisors, managers and leaders.

Program Outcomes:

Course participants will understand and rehearse best practices:

- Building rapport
- Establishing the protocols for a vibrant coaching partnership
- Creating performance objectives and personalized development plans
- Observing and note taking
- Analyzing and applying the observational data to promote reflection and integration
- Facilitating conversations to get the desired outcome
- Asking questions that move the conversation forward
- Responding to questions in a way that solidifies learning
- Acknowledging effort and promoting competency

Use Put Me In, Coach to:

- Establish protocols necessary for a professional learning community
- Coach student teachers in classroom practices
- Assist veteran teachers to refine their abilities
- Train students in academic and personal communication skills
- Lead employees toward enhanced performance

“Put Me In, Coach! transformed the practice of our supervising teachers as they were forced to take a deep and honest look at themselves and their practice. Being a mentor was clearly serious business. The training not only gave them the strategies and skills to be successful, it also instilled a clear sense of the responsibility and importance of their role as trainers.”
