

A Comprehensive Educational Model

Quantum Learning® for Teachers

Sponsored by Elementary Education Department of the National College of Education at NLU

June 21-25, 2010 • 7:30am-4:30pm each day
National-Louis University, Elgin campus
\$475

(includes 5-day workshop, all materials, continental breakfast each day, snacks and 2 lunches)

AHA! ... It Works!

Quantum Learning is a synergistic approach to the learning process, integrating best educational practices into a unified whole. It has been proven to increase student achievement and improve attitudes toward learning. And, by the way—Quantum Learning helps bring passion and fun back to teaching.

Learn key strategies to increase student achievement:

- Master powerful ways to motivate your students
- Create an engaging brain-compatible learning environment
- Learn how to use music in the classroom to enhance academic results
- Deliver effective presentations and elicit more participation
- Design dynamic lessons and implementation plans

Rigorous research:

- Positive impact on student achievement in 18 schools in four states
- 100% of teachers reported being more effective
- After Quantum Learning, students' grades increased by 35%

Credits available:

40 CPDUs: No cost

Graduate Credit Cost: \$213/semester hour for a total of \$639

3 semester hours of graduate credit offered for the Quantum Learning for Teachers.

There will be an additional project to complete after the 5 day workshop.
